- **Background of the Training** : Health is defined as a complete physical, mental and Social wellbeing and not merely an absence of diseases or infirmity. First Aid Training plays a very important role in delivering health service facilities. Knowledge of first aid helps a person to tackle a situation in emergency before a true medical intervention is achieved. With our long experience it is observed that most of the employees working under different J.J.Homes and delivering different services are lacking first aid training. As a result all the burdens to deliver the service facilities are mainly done by few subject expert. If the knowledge of first aid training is imparted to all the employees attached to this service delivery will undoubtedly enhance the service delivery in a better way. Keeping this view in mind the CWC has planned to conduct a First Aid Training programme for employees of JJ Homes, as per SCPS guidelines it has specified that the first aid training is mandatory.
- **Objective of the Training:**
 - 1) To impart First Aid Training and to enhance the knowledge about this.
 - 2) To develop skill of the employees of home in service delivery in general and health service delivery in particular.
 - 3) How to tackle the emergency situation of a sick inmates
- 1. **Justification:** The employees who are deployed at different homes are suffering from various problems which one of the health problem for the inmates which it is a very important and sensitive one. In this connection it is required a right and primary knowledge requiring First Aid Training in the SCPS guideline it has mentioned that it is mandatory to obtained First Aid Training and as per demand of the home employees, the CWC, Purba Medinipur thinks that it is very emergent to conduct the first aid training with immediate effect.
